

Raceceivers, Packages & Accessories

Fusion+

The Fusion+ is everything you need, 1-way radio, battery operated, not water resistant. Some of the outboarders have complained they can't hear their engine due to the earbuds. Battery lasts at least a weekend with available earbud upgrades / replacements. You have to add an earbud or helmet speakers which you may already have. This Raceceiver model has everything you need, but is the baseline offering. A great starter system Priced at \$99.95 (*Raceceiver only*) plus shipping at cost via USPS. Packages are available at additional cost.

Element w/Custom Package (*best, shown*)

This is a 1-way, water resistant unit, that is rechargeable via a USB cable. The earbuds are replaced by custom earmolds made to fit your ear canal exactly. They also prevent most engine noise from being heard. Ideal for engine forward inboards where noise is a problem. My experience in the Lauterbach Special says this is the unit to have but not everyone needs it. Price \$129.95 (*Raceceiver only*) plus shipping at cost via USPS. Custom Package Price \$279.90 plus shipping at cost via USPS.

Legend+ w/Semi-Pro Package (*shown*)

The Legend+ is similar to the Fusion+ but is a 2-way radio, battery operated, not water resistant. This is the unit that allows your shore observer to be giving you instructions on your selected channel, but the Referee preset channel has priority override. The Legend+ will function as a 1-way receiver or it can be a 2 frequency, 2-way radio when used with your personal 2-way shore/driver radio system (*shown*). Price \$109.95 (*Raceceiver only*) plus shipping at cost via USPS. Note: The basic price is only \$10 more than its 1-way counterpart (Fusion+). Legend+ w/Semi-Pro Package (*shown*) is \$144.95

Fusion+ w/Helmet Speakers (shown)

Helmet speakers Velcro/tape to the inside of your helmet allowing you to still hear your engine. (These were especially designed for Bill Edwards, #1937. As we all know it is a very difficult engine to hear.) Probably the best option for most outboarders. Price \$124.90 (Fusion+ w/Helmet Speakers) plus shipping at cost via USPS. The helmet speakers alone are \$29.95 plus shipping at cost via USPS.

Notes:

- The Raceceivers are available individually or in various accessory packages. All accessory upgrades, shown in any of these pictures, are also available separately. If you wish to purchase or discuss anything, please give us a call. The custom earmolds are one of the items you might want to add later, and can be sourced from many places. For club usage, Raceceiver has a 200pc. bag of replacement earbud foam covers to maintain sanitary conditions, if the units are to be shared from heat to heat. For additional product information you can browse the Raceceiver website at: <http://raceceiver.com/index.aspx>

- **The FVRC is a Raceceiver authorized supplier and must sell their products at the prices shown on their website. This is true for all of their suppliers.**
