

## Legend+

The RACEceiver Legend+ with built in Driver Splitter. The RACEceiver Legend+ is made to use with a 2-way radio. The RACEceiver Legend+ has 2 audio ports and takes the audio from the 2-way radio and routes it through the Legend+ and out so that the driver only has to use one earpiece to listen to both audio sources. It will reduce the volume of the audio from the 2-way radio when the officials are using the RACEceiver frequency and talking to the field, making it much easier to hear the instructions coming from the officials. The RACEceiver Legend+ has the same preprogrammed 1600 UHF channels or frequencies that all RACEceivers have so it can be used at tracks where the RACEceiver is mandated. The RACEceiver Legend+ comes with a fully enclosed holster, AAA battery, instructions, and a 36 mm male to male coiled cord. You may need an addition adapter depending on your 2-way radio set up.

## Fusion +

The RACEceiver Fusion+ with New & Improved Features: Button Lock, Louder Audio, and Narrow Band Radio Compatible

The RACEceiver Fusion+ for Drivers is being mandated at short tracks all over the country. This small communication device is revolutionizing the industry, making the sport safer for both the drivers and officials. It saves time by allowing officials to talk to all the drivers at the same time and lets you get on to more racing. The officials can warn drivers about accidents or debris on the track.

Virtually all tracks and series today use frequencies between 450-470mhz, and the RACEceiver Fusion+ handles all of them! They are preprogrammed, just dial up the channel you need to use. The RACEceiver Fusion+ has a programmable default channel so that you can save the channel that your track is using. Also, the NEW button lock feature prevents unwanted channel or volume changes. Its small size, great price, and reception—make it an awesome value.

Your RACEceiver Fusion+ comes with a holster clip, AAA battery and instructions. Be sure to pick the Earpiece that best suits your needs.

## Element

The NEW RACEceiver Element is Water & Dust Resistant with an internal, rechargeable battery. For Safety and Efficiency, the Race officials broadcast directly to drivers, allowing faster

line-ups and restarts and instant notifications of track conditions. Just plug the included USB charging cable into a power source, a full charge should take about 4 hours. You will be all set for the entire day event.

The RACEceiver Element has the same preprogrammed 1600 UHF channels or frequencies that all RACEceivers have, so it can be used at tracks where the RACEceiver is mandated. Because it is Water Resistant, it can be used in wet environments, for a variety of different sports!

The Element comes with a USB charge cord and holster.

## **Packages** (See <http://raceceiver.com/packages.aspx> for details and pricing.)

RACEceiver offers 10 different RACEceiver packages for the Element, Legend and Fusion. The packages include various accessories with a discounted total price.

### **Purchasing RACEceiver products from the FVRC**

- **Price** is the **same**, by contract, from RACEceiver or *any* authorized distributor.
- The FVRC can provide all the RACEceiver products shown on their website.
- The FVRC does receive a “commission” for all the RACEceiver products we provide via our website.
- Use the RACEceiver website to learn about their products and to make your choice(s). Return to the FVRC website to place and pay for your order.
- Snail Mail orders may be placed by contacting Dave Richardson.
- Website ordering help and RACEceiver information is available by contacting Roger Hinsdale.

Notes:

- 1) Fusion+ and Element are 1-way RACEceivers.
- 2) Legend+ is a 2-way radio (crew / referee) with referee priority
- 3) Fusion+ and Legend+ use a single AA battery
- 4) Element has a USB chargeable battery and is dust / water resistant
- 5) The earpiece earbuds have replaceable tips in two sizes
- 6) The helmet speaker works well with our mandated helmets and tape to the helmet frame (tape provided)
- 7) Prices shown are subject to change by RACEceiver, but reflect the current 5/1/2020 contract pricing.
