

Unlimited Hydroplane Experience
Friday, March 18th, 2022
Wooten Park, Tavares Fl.

This will go down as an experience that anyone will remember forever. A very few lucky people will get to ride in one of the most beautiful unlimited race boats of all time. At the only other event that Miss US was featured in, the limited number of rides was sold out. Do not be disappointed. Get your reservation in.

Owned by Jay Armstrong of Papillion, Nebraska. She will be driven by the several time national champion, Mark Weber of Detroit, Michigan. You will be using about 25 gallons of high-octane aviation fuel in your five laps on the course.

Miss US is an original Unlimited class hull built in 1957 by Henry Lauterbach with design assistance by Bob Rowland. Henry was considered the absolute premier builder of hydroplanes for some 30 years. After 54 years in storage, the hull was restored by Doug Morin. The motor is lovingly maintained by George Czarnecki, along with Chuck Herring.

She is by far the largest boat at the event at 31' 8". The engine is a 1943 Allison V1710 aircraft engine of 1710 cu. In. supercharged and puts out some 2000 horsepower. The engine was originally used in the famous Mustang WWII fighter aircraft.

The riders will be signed up as members of APBA to be allowed on course and must sign a waiver of liability. The fee for this once in a lifetime adventure is \$1500. This is payable with your reservation. As you can appreciate something may break on this old girl and it may not run. We will refund your payment should this occur.

Regards

Dave Richardson
